

SourceOne™

Program Overview

SourceOne Program Brings Industry-leading Performance to the Secondary Equipment Market.

Whether you choose to purchase a reconditioned probe system or trade in your old equipment (or simply let us buy it back!), we will support you every step of the way, from order to installation. FormFactor offers two SourceOne programs:

1

Trade-in / Buy-back Program

Take advantage of our SourceOne program, and purchase pre-owned probe stations and accessories with the quality you would expect from FormFactor. All equipment is inspected and tested to our exacting standards and performs “as new” without exception. Damaged or worn parts are replaced, software is updated to the latest available version with compatible control architecture. Receive a professional configuration review, and let us deliver a solution that balances your performance and cost requirements.

- Receive cash or credit for your returned probe station
- Credit is good toward any Cascade probe system or service
- Simplified logistics for easy shipping and handling
- Competitive market rates

2

Certified Pre-owned Equipment

Through SourceOne you receive competitive market rates for your used equipment. You always have the option to receive cash, or apply a credit toward the purchase of Cascade probe systems or services. If your test and measurement requirements are changing, and you need to upgrade to the newest products from FormFactor, trade in your equipment using SourceOne. If lab space is at premium and underutilized probe stations must be removed, take advantage of SourceOne simplified buy-back. We make the logistics easy – we’ll pack and ship your equipment and do all necessary paperwork at no cost to you.

- Purchasing from OEM removes the risk from used equipment acquisition
- Support from order configuration through setup reduces time to first measurement
- Complete factory refurbishment ensures like new performance
- Standard one-year warranty on probe stations is an extra assurance of quality

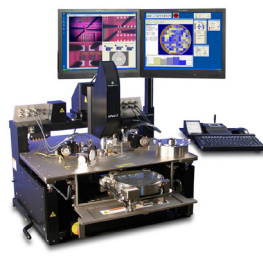

ELIGIBLE MODELS*

	150 mm	200 mm	300 mm
Manual	M150 PM5 REL 3200 REL 4100	PM8 REL 4800 Summit™ 11000B	Elite300™ PM300 S300
